	New policy		Minor/technical revision of existing policy
	Major revision of existing policy	X	Reaffirmation of existing policy

(A) Policy statement

The university of Toledo (UToledo) maintains a patient directory using protected health information (PHI) to facilitate locating patients for family, friends, and the clergy, provided the patient was given the opportunity to prohibit or restrict use or disclosure of directory information.

(B) Purpose of policy

In accordance with the Health Information Portability and Accountability Act (HIPAA), 45 CFR164.510A(a), patients must be informed of the PHI that will be included in the hospital directory and provide for an opportunity to restrict the use and disclosure of this information.

(C) Procedure

(1) The following PHI may be included in the hospital directory:

- (a) Individual's name
- (b) Individual's location in the facility
- (c) Individual's condition described in general terms that does not communicate specific medical information about the individual
- (d) Individual's religious affiliation

(2) Individuals have the right to prohibit or restrict the use or disclosure of directory

must be provided with the opportunity to restrict or prohibit some or all of the uses or disclosures as stipulated in policy 3364-100-90-03 Request for restriction of health information.

The decision to prohibit some or all of the uses or disclosures will be entered into the star system. The patient's medical record will reflect the patient's request for restrictions.

(3) Levels of privacy

UToledo has implemented three levels of privacy. The patient has the right to request the level of privacy and it can be changed at any time during their stay. In emergency situations, if there is no one to speak on behalf of the patient, the patient should automatically be listed as a level IV.

If the patient has not designated a level of privacy, or it is not an emergency situation, the patient should be considered a level I.

- (a) Level I - when a person asks for a patient by name, the directory information may be disclosed except for religious affiliation.
  - (b) Level II – religious affiliation may only be disclosed to members of the clergy.
  - (c) Level III - when a person asks for a patient by name, no information may be disclosed except that the patient is currently a patient of the institution.
  - (d) Level IV - when a person asks for a patient by name, we must state: "we have no current information on this person in our system". No information may be disclosed. Only those individuals the patient has specifically designated and provided with a code will be provided information. The code will be provided by a staff member. Codes also will be provided to patients at their request when it is necessary to protect the privacy of the patient.
- (4) Patients can obtain a code at pre-registration to provide to those who the patient would like to have access to the information about their healthcare.
- (5) Emergency. If the opportunity to object to uses or disclosures required cannot practically be provided because of the individual's incapacity or an emergency treatment circumstance, the regulations permit use or disclosure of some or all of the PHI from the hospital, if such disclosure is:
- (a) Consistent with a prior expressed preference of the individual, if any, that is known to the hospital
  - (b) In the best interest of the individual as determined by the hospital, in the exercise of professional judgment
  - (c) Registration will follow up with emergent admits to provide the individual with the opportunity to object to uses or disclosures for directory purposes.
